Soft Skills

- ☐ Teamwork
- ☐ Work ethic
- ☐ Adaptability
- ☐ Problem-solving
- ☐ Communication
- ☐ Leadership

Languages

- ☐ Sinhala
- ☐ English

Sithum Ridmal

Software Engineering undergraduate

Enthusiastic Software Engineering undergraduate skilled in developing applications, collaborating in team projects, and applying analytical thinking to solve technical challenges. Dedicated to improving coding practices and learning industry standards.

Projects

TripVista - Online Tour Guide

April 2025 - May 2025

Group project developed using Java (Servlets/JSP) with MVC architecture and MySQL. The system allows users to browse and book tour packages, view destinations via Google Maps, manage favourites, and update account details. Includes dedicated tour guide registration, admin management of packages and guides, and secure payment handling. [Git Repo](#)

Tech Stack: Java, Servlets/JSP, MVC, MySQL, Tomcat, HTML, CSS, JavaScript, Google Maps API

Mealmatrix - Smart Canteen System

July 2025 - October 2025

Smart canteen platform with food browsing, location-based filtering, ordering, cart, delivery/pickup options, chat support, AI-based food detection with nutrition info, admin and manager dashboards, delivery automation, and promotions module. Built using Next.js, Node/Express, MongoDB, Python, Flask, and PyTorch. [Git Repo](#).

GlamLink – Wedding & Glam Services Marketplace Web Application

November 2025 - December 2025

GlamLink is a full-stack wedding and glam services marketplace web application for sri lanka that connects customers with service providers such as bridal dress sellers, salons, photographers, car rentals, event planners, etc. The platform is not limited to weddings and can also be used for day-to-day services, such as finding nearby salons for haircuts and other beauty needs. It focuses on service discovery, communication, and engagement without handling direct payments. The system features user authentication, service listings with image galleries, ratings and reviews, cart functionality, seller listing management, and admin moderation.

Tech stack - Angular, PHP, MySQL, REST API's. URL :- glamlink.com.lk

WildGuard – Real-Time Animal Detection Platform

December 2025 - December 2025

AI-powered web application for real-time animal detection using live camera feeds and uploaded images. Deployed an optimized VGG16 (ONNX) model with a Flask backend and responsive frontend, enabling fast, cross-device inference in the browser. link :- [wildguard](#)

Education

BSc (Hons) in Information Technology Specializing in Software Engineering, SLIIT

June 2023 - Present

G.C.E. A/L, Thurstan College

2020 - 2023

Stream — Mathematics

Physics - C , Combined Mathematics - C, ICT - B

G.C.E. O/L, Thurstan College

2018 - 2019

Result :- A - 9

Certifications

Getting Started with Deep Learning, NVIDIA

(https://learn.nvidia.com/certificates?id=E7UHEj9KTdyecL1K_g72og)

December 2024

Front - End Web Development, University of Moratuwa

(<https://open.uom.lk/verify>)

January 2024

AI/ML Engineer - Stage 1, SLIIT

(<https://code.sliit.org/certificates/y5tzscghl9>)

July 2024
